PROJECTS

1. NICEHASH MONITOR – Python, REST API

Link: <https://github.com/SHADOW04985/Nicehash-monitor>

- This python project is based on the crypto mining website named Nicehash.
- You can view the hash rates and temperature of graphic cards of your crypto mining rig, 24-hour profitability and the current unpaid balance in a simple user interface.

2. Weather API – HTML, CSS, JavaScript

Link: <https://github.com/SHADOW04985/weather-forecast>

- By using the APIs available to track weather of the cities created a simple website where you can search the name of your place to get weather updates.

3. Face Mask Detection Using CNN – Python

Link: <https://github.com/SHADOW04985/Facemask-Detection>

- Simple program used to detect whether a person is wearing facemask or not

CERTIFICATIONS

- Certification of training from Verzeo for successfully completing a face mask detection project based on Artificial Intelligence
- Certification of training from Masai School for one day workshop on HTML and CSS, creating a replica of cricbuzz.com
